

Profile Summary

Software Developer with 2.5+ years of experience in Angular, React, and API integration. Skilled in building reusable components, exceeding sprint goals, and solving 100+ DSA problems in Python.

Technical Skills

- Front-End : Angular, React, TypeScript, JavaScript, HTML, CSS

Back-End : Spring Boot (basic), REST APIs

Programming : Python (DSA), TypeScript, JavaScript, C

Tools : Git, Jasmine, Karma, VS Code

Others : Android Development, Machine Learning, Postman, DBeaver, Cloud Foundry, Java

Professional Experience

- Software Engineer - II | Philips India Limited | Bengaluru, Karnataka

11/2024 - Present

 - Developed intuitive drag-and-drop column interface with backend-driven configurations, supporting integration of 4 modalities (MR, CT, CV, and DXR).
 - Designed 5+ reusable wrapper components to standardize code structure and enhance code modularity.
 - Closed all ad hoc tasks within 1 day, enabled timely release by addressing staging bugs, CRs, TDs, and PDs, and also finalizing uncommitted features, contributing to a perfect 10/10 business score.
 - Built Angular packages with ng-packagr, adopted by 3+ cross-functional teams.
- Software Development Engineer | Philips India Limited | Bengaluru, Karnataka

08/2022 - 11/2024

 - Enhanced Remote Service Workspot project by specializing in URL masking, launch conditions by using State Management of complexity rate being 4/5
 - Took sole ownership of driving 100% front-end development efforts for all CT device dashboards (X-Ray, Image Quality, and System List Dashboard).
 - Innovated a user-friendly pagination feature, replacing the endless scroll behavior for easier navigation across the application consisting of 10+ grids, improving usability and adoption rate.
 - Engineered an innovative help icon linking to a resource hub, increasing documentation access by 40% and enabling direct user feedback.
 - Introduced over 90 audit logs for application, enhancing monitoring efficiency.
- Intern | Philips India Limited | Bengaluru, Karnataka

08/2021 - 07/2022

 - Implemented RESTful APIs to enable efficient CRUD operations using Spring Boot and Thymeleaf in a workshop.
 - Generated and deployed local JAR files to Cloud Foundry every second sprint, boosting sandbox delivery efficiency.
 - Directed front-end development for Remote Connectivity Workspot independently and created over 15 complex graphs/plots with the Plotly library.
 - Implemented custom scrollable directives from scratch and achieved 100% completion rate.
 - Resolved git pull failures, boosted code coverage above 80% and unblocking 3-4 fellow developers.

Achievements

- Solved 150+ DSA problems in Python on platforms such as LeetCode/GFG to strengthen algorithmic skills.
- Received ₹1500 award in first Agile sprint for exceeding targets and accelerating delivery.
- Earned salary hike within 6 months by exceeding delivery benchmarks and independently owning key features.
- Led Proto-1 & Proto-2 delivery for Remote Service Workspot, ensuring timely rollout and quality assurance.
- Led 10+ product demos, with 90% positive stakeholder feedback for effective communication and tech insights.
- Earned 'Take Ownership To Deliver Fast' award for reviewing 50+ PRs and onboarding clear technical documentation.

Education

- M. TECH - Information Technology

BIRLA Institute of Technology, Ranchi, Jharkhand

2020-2022

CGPA: 9
- B. TECH - Information Technology

GITAM University, Visakhapatnam, Andhra Pradesh

2016-2020

CGPA: 8.61
