

PROFILE SUMMARY

UI Frontend Developer with 3+ years of experience building Single Page Applications (SPA) using Angular, React, TypeScript, JavaScript, RxJS, HTML, CSS, and REST APIs. Skilled in developing responsive, cross-browser UI components, performance optimization, and delivering user-focused solutions in Agile teams.

TECHNICAL SKILLS

- Front-End** : Angular (v18+), React, TypeScript, JavaScript, RxJS, Signals, HTML, CSS, SCSS, Responsive Design, SPA Development, Responsive UI and Web interface development, Web components
- UI/UX** : Component Architecture, UX Enhancements, State Management, Pagination, Forms, Cross-Browser Compatibility
- Others** : REST APIs, Python (DSA), Agile/Scrum
- Tools & Platforms** : Git, VS Code, Postman, Jasmine, Karma, Cloud Foundry
- AI-Assisted Development** : GitHub Copilot, ChatGPT (code generation, debugging, documentation, and code reviews)

PROFESSIONAL EXPERIENCE

Software Engineer - II | PhilipsIndia Limited | Bengaluru, Karnataka | 11/2024 - Present

- Conversation Forking** - Developed a conversation branching system allowing users to fork AI-chat sessions from any message, with centralized branch-state management, snapshot persistence, and seamless branch switching.
- Real-Time Cross-Application Data Synchronization** - Developed real-time cross-window and cross-application synchronization using Angular, RxJS (switchMap, debounceTime), Server-Sent Events (SSE), and Web Components, ensuring consistent data propagation between embedded widgets, host applications, and Service Plan modules.
- Developed a configurable drag-and-drop interface for 4 imaging modalities (MR, CT, CV, DXR) using backend-driven configurations, improving workflow customization.
- Built Angular packages with ng-packagr and Angular custom elements for React integration, enabling reuse across 3+ cross-functional teams and external applications.
- Consistently resolved release blockers, completed ad-hoc deliverables within tight timelines, and contributed to a perfect 10/10 business score.

Software Development Engineer | Philips India Limited | Bengaluru, Karnataka | 08/2022 - 11/2024

- Implemented URL masking in Angular Single Page Application(SPA) and optimised launch conditions using State Management of complexity rate being 4/5.
- Took sole ownership of driving 100% front-end development efforts for all CT device dashboards (X-Ray, Image Quality, and System List Dashboard).
- Innovated a user-friendly pagination feature, replacing the endless scroll behavior for easier navigation across the application consisting of 10+ grids, improving usability and adoption rate.
- Engineered an innovative help icon linking to a resource hub, increasing documentation access by 40% and enabling direct user feedback. Introduced 90+ audit logs for application, enhancing monitoring efficiency.

Intern | Philips India Limited | Bengaluru, Karnataka | 08/2021 - 07/2022

- Improved Angular app deployment workflow by deploying local JAR files to Cloud Foundry every second sprint, boosting sandbox delivery efficiency.
- Directed front-end development for Remote Connectivity Workspot independently and created over 15+ complex graphs/plots with the Plotly library.
- Implemented custom scrollable directives from scratch and achieved 100% completion rate.
- Resolved git pull failures, boosted code coverage above 80% using Jasmine/Karma unit testing and unblocking 3-4 fellow developers.

ACHIEVEMENTS

- Solved **150+ DSA** problems in Python on platforms such as LeetCode/GFG to strengthen algorithmic skills.
- Received **award** in first Agile sprint for exceeding targets and accelerating delivery.
- Earned **salary hike within 6 months** by exceeding delivery benchmarks and independently owning key features.
- Led Proto-1 & Proto-2 delivery** for Remote Service Workspot, ensuring timely rollout and quality assurance.
- Led 10+ product demos, with **90% positive stakeholder feedback** for effective communication and tech insights.
- Earned **'Take Ownership To Deliver Fast'** award for reviewing 50+ PRs and onboarding clear technical documentation.
